PROFILE

I put sensors, meters and valves in the field and make sure their data reaches the people who run the network.

Mechatronics engineer working on smart water and LoRaWAN systems in Jordan. My work covers device configuration, data loggers, gateways, SCADA and PLC systems, field installation, and the troubleshooting that keeps them running. I also write software when a team needs a tool that doesn't exist yet.

15,000

smart water meters installed under my supervision

1,200

electronic valves installed under my supervision

300

pressure data loggers installed under my supervision

EXPERIENCE

Oct 2026 – Present

Technical & Operations Engineer · LoRa & IoT

[Spectrum for IoT](#) · Full-time, hybrid

- Supervise field installation of IoT devices and LoRaWAN infrastructure.
- Work on the smart water valves project to reduce water loss and keep the network supplied around the clock.
- Building the company's attendance and payroll web app.

Jun 2025 – Sep 2026

Automation Engineer

[Al-Wefaq Control Systems](#)

- Smart water projects: LoRaWAN metering, data loggers and SCADA integration.
- Configured KROHNE and ABB flow meters.
- Worked with PLCs, HMIs and RTUs in water infrastructure, including Schneider SCADAPack controllers.

PROJECTS

MIYAHUNA

PRESSURE

Pressure management network

End-to-end pressure monitoring with Miyahuna: supervised the installation of 300 data loggers, programmed them, connected them over LoRa, and tracked down field faults so readings kept arriving.

Data loggers

LoRaWAN

Troubleshooting

SPECTRUM FOR IOT

VALVES

Smart water valves

Supervised the installation of 1,200 remotely controlled electronic valves that cut water loss, organize the supply rotation between areas, and keep water in the network 24 hours a day.

Aquana valves

LoRaWAN

Field install

METERING

METERS

Smart water metering

Supervised the installation of 15,000 smart water meters, including Spire ultrasonic meters reporting over LoRa gateways, and configured KROHNE and ABB flow meters.

SPECTRUM FOR IOT

SOFTWARE

Attendance & payroll app

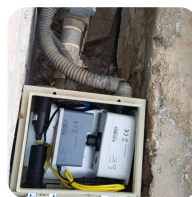

An installable web app for clock in/out with location, leave and overtime requests, overnight site trips, manager approvals and monthly payslips under Jordanian labour rules.
